Activity: 2

PHP Project on

College Notes/Assignment/Activity Management

Name: YOGESH KUMAR

USN: 19MCAR0035

Semester: 3rd Semester

Branch: MCA

Acknowledgement

The successful completion of any task would be incomplete without thanking the people who made it possible whose constant guidance and encouragement motivated my effort with success.

It is my great pleasure to thank my guide “**Prof. Mehtab Mehndi**” for his excellent guidance, constant encouragement, support, constructive suggestions.

I, also thank all the faculties of the Computer Application Department for their suggestions enabled us to surpass many of the seemingly impossible hurdles.

Finally, I would like to show my gratitude to my family members and all friends for advice and kind co-operation for without which this project would have been just a dream.

Yogesh Kumar

Declaration

I hereby declare that the work which is being prepared in this activity report entitled **“PHP Project on College Notes/Assignment/Activity Management”** for the award of the degree of Master of Computer Application, submitted in the Department of Master of Computer Application, Jain Deemed To Be University, Jayanagar 560068, Bengaluru, Karnataka, India is an authentic record of my own activity work carried out under the supervision of Prof. Mehtab Mehndi

Yogesh Kumar

INTRODUCTION TO PROJECT

Below are the tasks which can be performed in this PHP application:

- Admin, Teacher and Students Registration.
- Single login page through which admin, teacher or student can login to their particular dashboard.
- Assignments, Activities projects and Certifications for particular subject can be uploaded by student.
- Teachers also can upload documents related to test etc.
- Admin can approve or disapprove the uploaded document.
- After approval the uploaded document will be seen by that particular subjects teacher and other students.
- Admin, Teacher or Student can edit their profile, change avatar or reset password.
- Student and teachers have to select the particular subject while signing up on the application so that they can see documents related to that subject only.
- Admin can directly delete the uploaded documents.
- Admin can manage users like he can delete the users also.
- Only allowed type of files can be uploaded by teachers or students.
- Note: This documentation only contains php files and screenshots of the project.

SCREENSHOTS

The screenshot shows the top navigation bar of the JGI JAIN website, identical to the first screenshot. Below the header is a user registration form. The form fields are as follows:

- Name**: Text input field containing "Yogesh Kumar".
- Email**: Text input field containing "yogeshvishwakarma1994@gmail.com".
- Create a username**: Text input field containing "19MCAR0035".
- Create a password**: Password input field (masked with dots).
- Confirm your password**: Password input field (masked with dots).
- Gender**: Dropdown menu with "Male" selected.
- I am a..**: Dropdown menu with "Student" selected.
- I teach/study..**: Dropdown menu with "Web Programming" selected.
- Sign me up!**: Blue button.

The screenshot displays the phpMyAdmin web interface. On the left sidebar, the database structure is shown with 'notes' and 'users' databases. The 'uploads' table is selected under 'notes'. The main panel shows the table's structure with columns: file_id (PRI, int), file_name (varchar), file_description (text), file_type (varchar), file_uploaded_on (timestamp), file_uploaded_to (varchar), file_uploader (varchar), and status (varchar, not null). Below the structure, the 'Query results' section shows the results of a 'SELECT * FROM `uploads`' query. The results table has 2 rows and 8 columns. The first row is for 'Web Programming Activity 1' and the second for 'Mongo db Certification'. At the bottom, there are options to 'Bookmark this SQL query' and a checkbox to 'Let every user access this bookmark'.

Database: notes » Table: uploads

Showing rows 0 - 1 (2 total, Query took 0.0018 seconds.)

```
SELECT * FROM `uploads`
```
